10 Seasonality of results

The Group's income consists of rental and investment income. Rental income is not significantly affected by any seasonal impact as it depends on annual lease contracts which are recognised in the income statement on a straight-line method and in accordance with different terms of these contracts. In addition, there is limited fluctuation on the rent rates where the Group's investment properties are located. Investment income depends on market conditions, investment activities of the Group and declaration of profit by investee companies, which are of a seasonal nature. Accordingly, results of investment income for the period ended June 30, 2022 are not comparable to those relating to the comparative period and are not indicative of the results that might be expected for the year ending December 31, 2022.
